

IT Help Guide

Nimbus Home Appliances (Pvt) Ltd · Updated March 2026

1. Getting help

The IT helpdesk is open Monday to Saturday, 9:00 am to 7:00 pm. Raise a ticket by emailing helpdesk@nimbus-appliances.example or by calling extension 250. Urgent issues (no internet at a branch, POS down) should be reported by phone.

2. Passwords

Reset a forgotten password yourself at the self-service portal:

<https://reset.nimbus-appliances.example>. You will need your employee ID and the phone number registered with HR. Passwords must be at least 12 characters and must be changed every 90 days. The last 5 passwords cannot be reused. Never share your password, including with IT staff.

3. VPN access

To connect to company systems from home, install FortiClient VPN from the Software Center and connect to vpn.nimbus-appliances.example with your normal login. VPN access is available only to staff approved for remote work.

4. Wi-Fi

Staff devices connect to the network 'Nimbus-Staff' using their normal login. Visitors use 'Nimbus-Guest'; the daily guest password is available at reception.

5. Laptops and repairs

If your laptop is slow, broken or damaged, raise a helpdesk ticket. IT aims to respond within 4 working hours and provides a loaner laptop when a repair takes more than 1 working day. A lost or stolen laptop must be reported to IT within 24 hours so it can be locked remotely.

6. Software

Approved software can be installed from the Software Center without admin rights. Any other software requires a helpdesk ticket and approval from your line manager.

7. Email on your phone

Install Microsoft Outlook from the App Store or Play Store and sign in with your company email. The Microsoft Authenticator app is required for two-step sign-in.

8. Printers

Head office printers are on every floor. Send jobs to 'Nimbus-Print' and release them at any printer with your ID card. Colour printing requires manager approval.

9. Security

Forward suspicious emails to phishing@nimbus-appliances.example and then delete them. Do not click links or open attachments you did not expect. USB storage devices are blocked on company laptops.
